- 三. Specification
- 四. Products

Introduction

Perforated Metal Materials: stainless steel, aluminum, carbon steel, aluminum-magnesium alloy plate, copper plate, nickel plate, galvanized plate, coil, etc.

Net hole punching can be customized: rectangular hole, square hole, diamond hole, round hole, hexagonal hole, cross hole, triangle hole, a long hole, a long waist-hole, plum blossom hole, scale hole, hole patterns, five-pointed star shaped hole, hole, etc. from the drum.

Usage: Metal Mesh is widely used in chemical machinery, pharmaceutical equipment, food and beverage machines, cigarette machines, harvesters, dry cleaning machines, ironing table, silencing equipment, refrigeration equipment (central air) speakers, crafts, paper, hydraulic fittings, filtration equipment and other industries.

Production capability

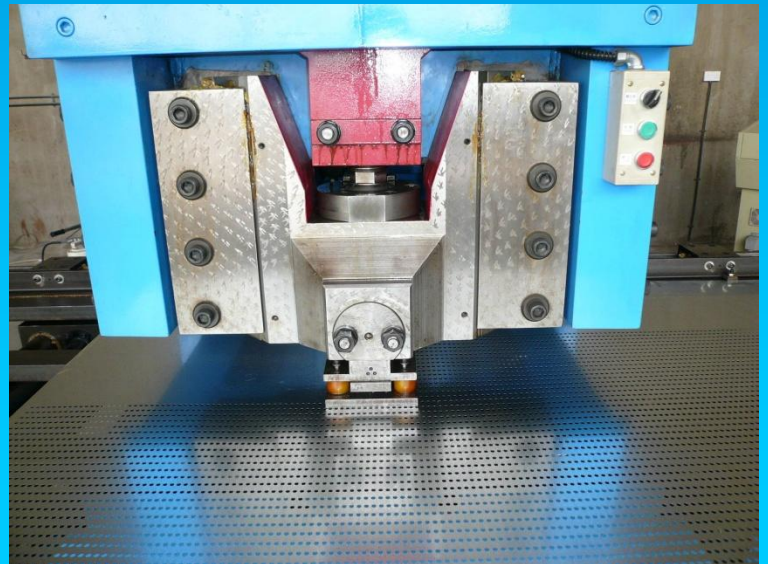

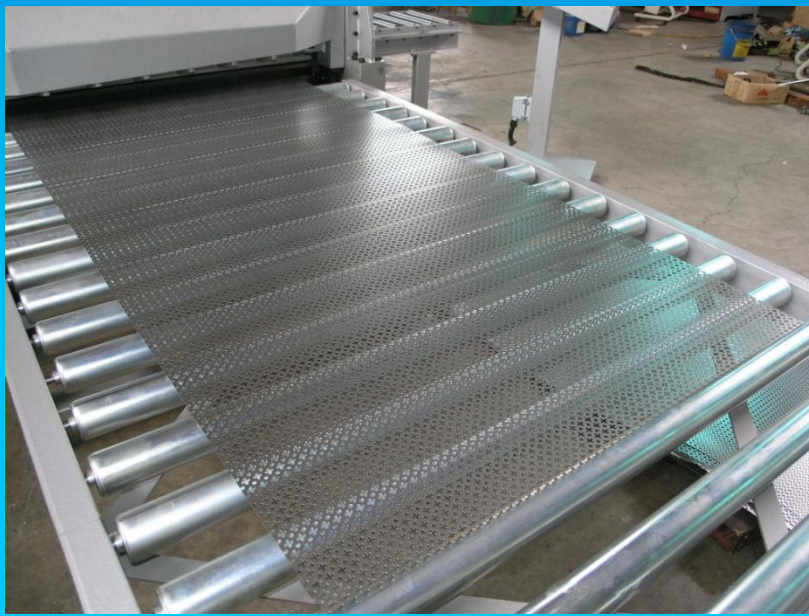

We have a series of supporting staff and processing machinery, including the professional mode with division, mold making tools, CNC punching machine, laser cutting machine, hydraulic press, the whole Level machine, polishing machine, washing machine and set up the oxidation, painting, sandblasting, galvanizing, Spray, dip, etc. The workshop used for a special surface treatment. It also can have bending, welding, rolling, cutting, molding, labeling, packaging, degreasing, debarring, Yang Gate oxide of deep processing capacity.

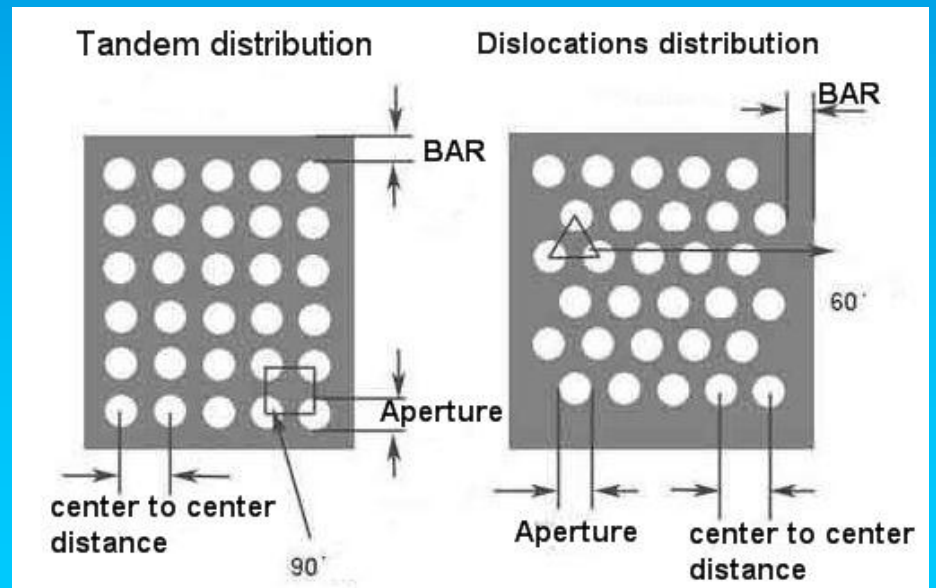

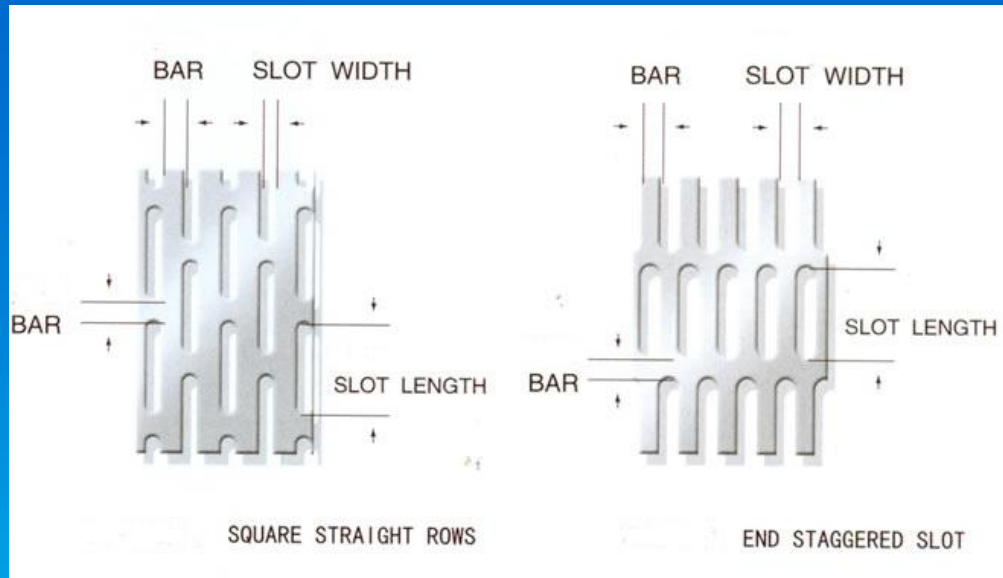

Our daily output can reach 2,000 square meters, and product materials including stainless steel, carbon steel, The zinc plate, galvanized, aluminum, brass, copper, plywood, fiberboard, rubber board, cardboard, Wood, aluminum-magnesium alloy plate, nickel plate, fiber glass, PVC board and a variety of the compounds.

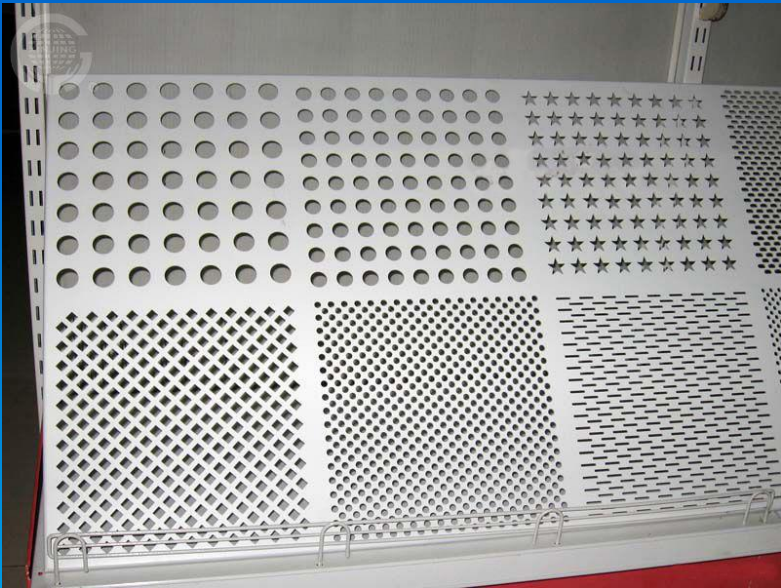

Minimum aperture of our products can reach 0.08mm maximum thickness of 25mm, The pass includes a round hole, square hole, a long hole, oval hole, diamond hole, triangle hole, Fish Ling Kong, hexagons, and you need a variety of decorative pass.

Specification

Normal Perforated Metal Mesh Specification							
material	thickness (mm)	Aperture (mm)	hole spacing (mm)	wide (m)	length (m)	punching rate (%)	weight (kg/m2)
Coil sheet	0.2	6	2	1	20	44	0.88
	0.35	5	4	1	20	24	2
	0.45	6	3	1	20	35	2.5
	0.8	3	3	1	20	19.6	3
Flat sheet	0.5	1	1	1	2	19.6	3.14
	0.8	1.5	1.5	1	2	19.6	5
	1.5	2	2	1	2	19.6	9.4
	3	5	16	1	2	19.6	18.8
stainless metal plate	0.5	1	1	1	2	19.6	3.14
	0.8	1.5	1.5	1	2	19.6	5
	1	2	2	1	2	19.6	6.28
	2	5	16	1	2	19.6	6.28
Aluminum plate	0.5	1	1	1	2	19.6	1.08
	0.8	3	3	1	2	19.6	1.72
	1.5	2	2	1	2	19.6	3.24
	2	4	16	1	2	19.6	4.23
